Index of figures and tables	XI	
Abbreviations	XXI	
Preface	XXV	
1	General information	1
2	Legal regulations	5
2.1	Air and noise	5
2.1.1	EU Immission protection	5
2.1.2	Relevant laws in Germany	13
2.2	Water / waste water	16
2.2.1	EU protection of water	16
2.2.2	Relevant laws in Germany	29
2.3	Waste	35
2.3.1	EU legislation on waste	35
2.3.2	Relevant laws in Germany	39
2.4	Chemicals	40
2.4.1	EU legislation on chemicals	40
2.4.2	Relevant laws in Germany	52
2.5	Other ecological regulations	54
2.5.1	Fire safety standards	54
2.5.2	Azo colourants	59
2.5.3	Waste water relevance classification of auxiliaries according to TEGEWA	64
2.5.4	Classification of auxiliaries according to the SCORE system	67
3	The textile chain (from raw materials to finished goods)	70
3.1	The nature of textile fibres	70
3.2	Textile processing	75
3.3	Wet-processing in textile finishing	81
3.4	Class of main chemicals used in the TFI	81
4	Pretreatment	84
4.1	Introduction	84
4.2	Pretreatment techniques	88
4.2.1	Mechanical treatment techniques	88
4.2.2	Wet- and thermo treatment techniques	88
4.3	Pretreatment of cotton, linen, flax and jute	89
4.3.1	Desizing of woven fabric	89
4.3.2	Scouring/alkaline extraction/kiering	94
4.3.3	Bleaching	100

4.3.4	One-step desizing, scouring and bleaching of cotton fabric	105
4.3.5	Mercerising/caustic soda treatment	106
4.3.6	Optical brightening	108
4.3.7	Cationisation (surface modification)	109
4.4	Pretreatment of wool	110
4.4.1	Raw wool scouring	111
4.4.2	Carbonising	114
4.4.3	Scouring/desizing	115
4.4.4	Crabbing / thermo-fixing / sanforizing	116
4.4.5	Fulling / felting	117
4.4.6	Anti-felting treatments for wool (easy-care finishing)	118
4.4.7	Bleaching / optical brightening of wool	123
4.5	Pretreatment of silk	125
4.5.1	Degumming / boiling-off	126
4.5.2	Fixation of sericin on silk	127
4.5.3	Weighting of silk	127
4.5.4	Plasma treatment of degummed silk	128
4.5.5	Bleaching of silk / optical brightening	128
4.6	Pretreatment of man-made fibres	129
4.6.1	Pretreatment of half-synthetic fibres (regenerative cellulose, cellulose ester)	131
4.6.2	Pretreatment of synthetics	132
4.7	Pretreatment agents and auxiliaries	138
4.7.1	Bleaching agents and auxiliaries	138
4.7.2	Surfactants	142
4.7.3	Other pretreatment agents	155
5	Colouring	156
5.1	Introduction	156
5.2	Dyeing	159
5.2.1	General principles of dyeing	159
5.2.2	Dyeing techniques	160
5.2.3	Dyeing of cellulose fibres	166
5.2.4	Dyeing of wool	180
5.2.5	Dyeing of silk	188
5.2.6	Dyeing of polyamide fibres (nylon)	188
5.2.7	Dyeing of polyester fibres	192
5.2.8	Dyeing of cellulose acetate (AC) and cellulose triacetate (CT)	195
5.2.9	Dyeing of acrylic fibres	197
5.2.10	Dyeing of other synthetic fibres	199
5.2.11	Dyeing of Fibre blends	202
5.3	Printing	209
5.3.1	General principles of printing	213
5.3.2	Printing techniques	215
5.3.3	Chemicals used for machine preparation and maintenance	226
5.3.4	Primary chemicals in printing pastes	231
5.3.5	Printing on cellulose	241

5.3.6	Printing on synthetic fibres	255
5.3.7	Printing on protein fibres (wool and silk)	263
5.4	Dyestuffs	268
5.4.1	Acid dyes	277
5.4.2	Basic (cationic) dyes	279
5.4.3	Direct (substantive) dyes	280
5.4.4	Disperse dyes	282
5.4.5	Metal-complex dyes	284
5.4.6	Mordant dyes (chrome dyes)	287
5.4.7	Naphtol dyes (azoic dyes developed on the fibre)	289
5.4.8	Reactive dyes	293
5.4.9	Sulphur dyes	299
5.4.10	Vat dyes	300
5.4.11	Natural dyes	308
5.4.12	Pigments	351
5.4.13	Solvent and ink-jet dyes	352
5.5	Colouring auxiliaries	353
5.5.1	Dyestuffs formulations	353
5.5.2	Other colouring auxiliaries	356
6	Finishing	373
6.1	Introduction	373
6.2	Finishing techniques	376
6.2.1	Mechanical/physical treatments	376
6.2.2	Chemical treatments	377
6.2.3	Coating and laminating	378
6.3	General finishing: refinement of look and feel	381
6.3.1	Optical brightening	381
6.3.2	Softening	381
6.3.3	Stiffening	393
6.3.4	Special breakthrough effects such as ajoure, devore, crêpe, etc.	394
6.3.5	Delustring	396
6.3.6	Lustring and metallic effects	397
6.3.7	Sculptured effects such as seersucker, crepe, cloque, etc.	398
6.4	Functional conditioning (ennoblement)	398
6.4.1	Waterproof handle and filling refinement	398
6.4.2	Swelling resistance finishing	399
6.4.3	Shrink resistance finishing	399
6.4.4	Easy-care finishing: non-creasing and permanent press conditioning	400
6.4.5	Easy care finishing of wool: anti-felting and shrink-resistance	414
6.4.6	Finishing using repellents	415
6.4.7	Non-slip, ladder-proof and anti-snag finishes	424
6.4.8	Finishing with flame retardants	425
6.4.9	Anti-electrostatic finishes	443
6.4.10	Antipilling finishing	446
6.4.11	Stabilizing against UV radiation and light	446

X

6.4.12	Finishing with biocides	447
6.4.13	Chemicals in coating and laminating	457
6.5	Other finishing chemicals	461
6.5.1	Antifoams	461
6.5.2	Fillers	462
6.5.3	Surfactants	462
6.5.4	Polymers	463
6.5.5	Stain blockers / soil repellents / soil release agents	464
6.5.6	Biocides	464
6.5.7	Agents and additives to promote bonding of fibres and threads	467
6.6	Intelligent textiles	468
6.6.1	Finishing with microcapsules	468
6.6.2	Other concepts for intelligent / smart textiles	482
7	Environmental considerations for textile processes and chemicals	484
7.1	Textile Production	484
7.1.1	Techniques for exhaust air, waste water and solid waste treatments	485
7.1.2	Pretreatment	498
7.1.3	Dyeing	524
7.1.4	Printing	574
7.1.5	Finishing	591
7.2	Textile use	608
7.2.1	Toxicology	608
7.2.2	Labels	623
7.3	Disposal of textiles	646
8	Glossary on textile finishing	648
9	SUMMARY	662
Appendix 1	References	665
Appendix 2	Branch Specific Data on Chemical Substances	711
Appendix 3	Alphabetical List of Textile Chemicals	1069
Appendix 4	References Chemical Substances	1109
Appendix 5	Index of Key Words	1175
